COVID-19 Vaccines for Kids

Vaccine and Booster Facts:

- COVID-19 Vaccines are **safe** for children 6 months and older

- Children get a **small amount** of the COVID-19 vaccine.

- Children **cannot** get COVID-19 from the vaccine

- Vaccines teach your child's body **how to fight the COVID-19 virus**

- COVID-19 vaccines do **not** cause fertility problems or issues

- 3 brands of vaccines are available:
  - **Pfizer** (6 months and older)
  - **Moderna** (6 months and older)
  - **Novavax** (12 years and older)

- Booster shots help your child's body remember how to fight off the virus

- Booster shots help your child's body fight new variants

Vaccine Side Effects:

Your child might have mild side effects:

- Pain in the arm where they got the vaccine

- Feeling tired

- Headache

- Low fever or chills

- Muscle or joint pain

These side effects are **normal** and **stop after a few days.** They show that the vaccine is working.

Ask your child's doctor if you have questions.
