

Tour the Achieve Database

Find out:

- How it works
- What data is captured
- If it is right for your organization
- Next steps

What is Achieve?

- Achieve is an affordable, user-friendly database that meets the unique program and reporting needs of literacy programs.

How it works

- Achieve is a cloud-based database application
- Enter information from a browser – Chrome preferred

Data Captured

- Learners and Volunteers contact, demographic, work status, education, and availability information
- Class rosters and attendance
- One-on-one tutor/learner pairings
- Learner goal setting and attainment
- Learner assessment data
- Volunteer hours

Achieve Database

Price

Pricing based on a calendar year.
